The *Superior* Range

Our finest collection of high performance composite doors

# Don't compromise, go composite, go Safe Seal

As a long established company since 2007 deal direct with owners David & Daniel. We don't believe in compromising on quality. We've brought together materials to give you the very best in strength, easy maintenance, security, and weather resistance. Oh - and great looks as well.

When choosing a Safe Seal composite, you'll find the latest technology and design in doors. When you're indoors you'll enjoy loads of style, strength and security. Our composite door is thick - but it's also very smart. In fact it's 44mm thick (compare that to conventional PVC panel doors at 28mm). Its powerful too, its super-strong structural frame and up-to-the-minute hardware makes our composite door even more secure. Its glass reinforced plastic finish means you'll be secure in all weathers and enjoying great looks for years to come.

## Hurricane tested

The average rainfall in the UK is between 700mm a year in East Anglia and 3,000mm a year in the Scottish Highlands.\* So we've designed our doors to be fully protected against extreme weather conditions.

Safe Seal composite doors are tested in a pressurised chamber to simulate gusting winds starting at 63 miles an hour and up to 80 miles an hour - that's stronger than a hurricane. Then they are tested further by spraying two litres of water every minute directly at the door in their test chamber - that's a serious amount of rain. So even when it's cats and dogs out there, your door will keep you snug and dry.

### WATERTIGHTNESS

Tested in accordance with BSEN 1027

### AIR PERMEABILITY

Tested in accordance with BSEN 1026

### WIND RESISTANCE

Tested in accordance with BSEN 12211
